

Polar bears migrate on a similar path every autumn to places where ice is beginning to re-form. These paths help them to survive and thrive where they live. God has also laid a path for us to follow, if we ask Him to guide our way (Psalm 25:4-5).

### YOU WILL NEED:

- White Modeling Material
- Black Permanent Marker
- Sandpaper
- Paper
- Dense Styrofoam, at least 1" thick
- Hot Glue Gun ⚠
- Scissors
- Pencil
- Craft Knife ⚠
- Brushes
- Paint

### DIRECTIONS:

1. Draw two silhouettes of a walking polar bear, or print from template\*.

2. Cut out the two different silhouettes of the bear.

3. Place the silhouettes on the Styrofoam. Trace around them. Cut out the two halves of the bear along the outline.

4. Place both halves of the polar bear so they are facing each other. Round and smooth the edges of the body on the outside. Trim and smooth the legs inside and out.

5. Glue the two halves of the polar bear together at the head and body.

6. Sand the entire surface of the polar bear.

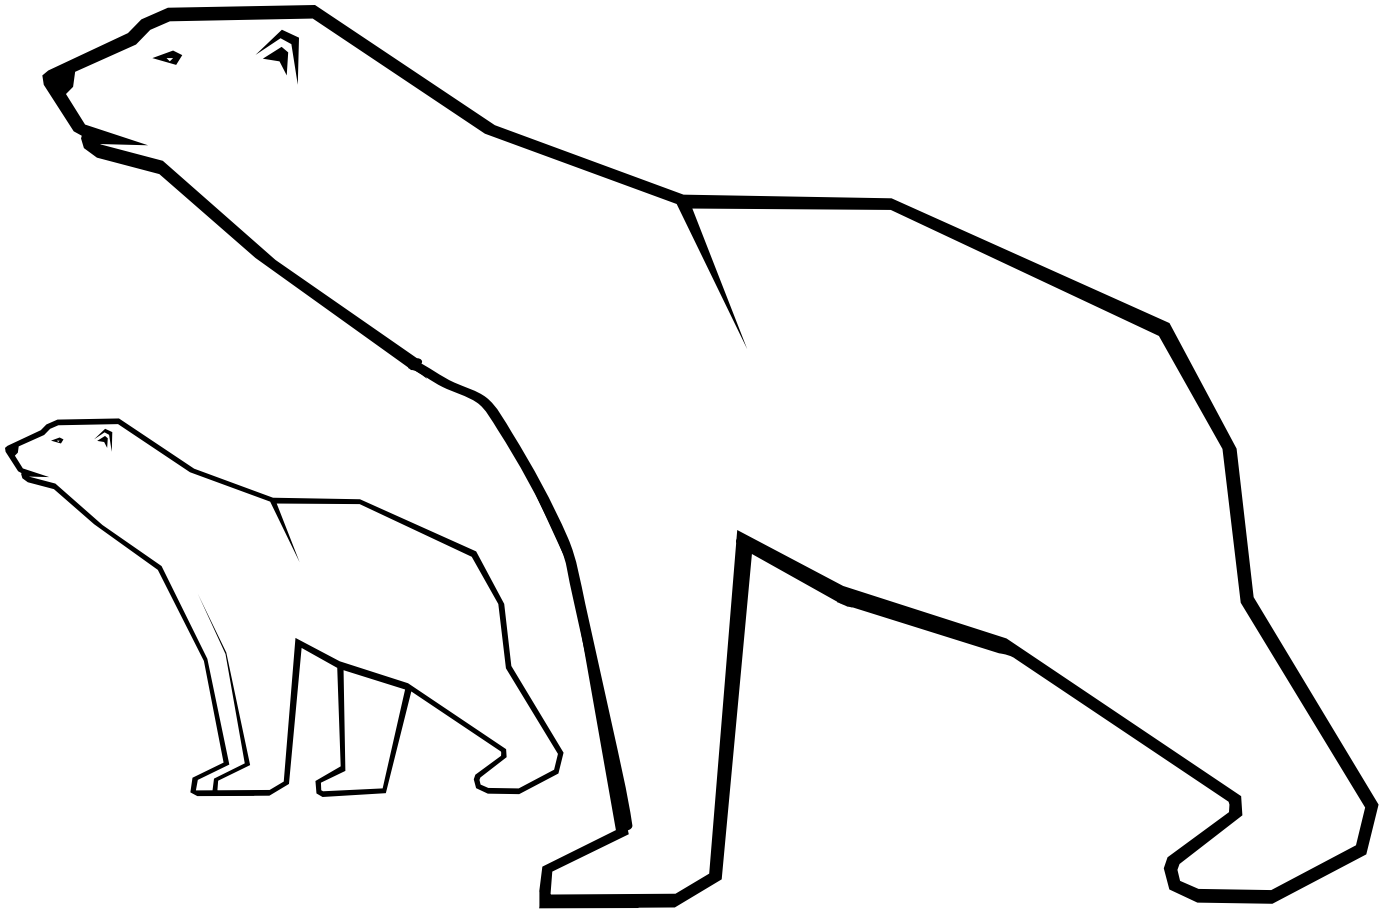

7. From modeling material, make a small cub that will lie on its mother's back. Let it dry.

8. Paint the polar bear and cub white. Let it dry. If necessary, add 2-3 more coats of paint.

9. Draw eyes, nose, ears and claws on the polar bear and cub with a marker. Mama bear and her cub are ready to follow the path where they can thrive. Let's follow the path God has for us so we can thrive too!
