

BEAUTIFUL View

Nehemiah was frustrated how some of God's people would compromise, yet Nehemiah had in view the beauty of God's grace. He reminded the people why God alone deserves all our praises (1 Chronicles 16:8-9).

YOU WILL NEED:

- Transparent Multi-colored Beads, Glass, Plastic etc.
- Aluminum Foil
- Poster Board
- Cardstock
- Brush
- School Glue
- Electrical Tape
- Wax Paper
- Ruler
- 1 Long, Empty Paper Can with a Plastic Lid
- Masking Tape
- Clear Plastic Sheet
- Hot Glue ⚠
- Awl ⚠
- Design Paper (Plastic Container)
- Marker

DIRECTIONS:

1. Thoroughly wipe out the inside of the can with a damp paper towel. Pierce the bottom of the can with an awl.

5. Cut out a small circle in the center of the cardstock circle. Stick the cardstock circle on the bottom of the can and then put a circle of plastic over it.

9. Pour the pieces of beads, glass and plastic onto the plastic circle inside the can.

2. Cut out a piece of poster board 8½"x7". Divide this piece into three equal parts lengthwise and score two grooves. Glue the aluminum foil onto the poster board. Smooth out the foil, cutting off the excess.

6. Insert the triangle mirror inside the can. Lay the second plastic circle on top of the triangle.

10. Lay a piece of wax paper over the top.

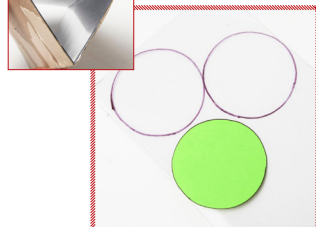

3. Fold up the poster board along the grooves to make a triangle. Tape it closed. Cut out three 7"x2¼" strips from a piece of flat plastic. Insert those strips into the inside of the triangle, turning it into a mirror.

7. Cut out several narrow ½" strips of poster board. Wrap these strips around the inside of the can and fix in place with hot glue.

11. Trim off excess wax paper. Apply hot glue around the edge of the can to stick the plastic lid on.

4. Cut out two 2¾" circles of flat plastic and one circle of cardstock.

8. Glue a piece of designer paper around the outside of the can. Add a label with the word "Kaleidoscope" on it.

12. Wrap electric tape around the top so that the lid is closed securely. Wrap some electric tape around the bottom of the can also, for symmetry. Enjoy the beautiful view as you turn the kaleidoscope and look inside.
