

# CASE for SHADES

Sunglasses protect our eyes from harmful light and help us to see when it's sunny outside. When we share the good things Jesus has done for us, we can help others to see His love more clearly (John 9:35-38).

## YOU WILL NEED:

- Fabric or Colored Paper
- Thin Foam Padding
- Tacky Glue
- Magnetic Tape
- Cardboard
- Hot Glue Gun
- Pencil
- Brush
- Ruler
- Scissors
- Craft Knife

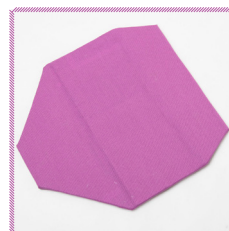

## DIRECTIONS:

1. Measure the length, width and height of your sunglasses while they are folded. Write down the dimensions, adding a narrow seam allowance of 1/2" to each measurement.

5. Cut out a piece of the thin foam padding and place it on the bottom of the box.

9. Glue another piece of fabric or paper over the inside of the lid to cover the cardboard.

2. Cut out 5 pieces of cardboard for the box: 1 bottom (using length & width), 2 long sides (length & height), and 2 narrow sides (height & width).

6. Measure the top of the box. Cut out a cardboard lid for the box. Also cut out a front and back flap.

10. Place the lid on the box. Glue the back flap of the lid to the back of the box on the outside.

3. Glue the cardboard box together.

7. Glue the pieces for the lid onto fabric or colored paper, separating the pieces by 1/4".

11. Cut two pieces of magnetic tape 2" long. Hot glue one piece of tape under the front flap of the lid. Let cool. Place the other piece of magnetic tape over the glued tape. Apply hot glue to it and close the lid. Wait for it to cool completely.

4. Using Tacky Glue, glue fabric or colored paper to both the outside and the inside of the box.

8. Trim the fabric or paper so there is a 1" border around the pieces. Fold the edges over the cardboard and glue.

12. Decorate the sunglasses box as you like. Put the glasses in the box. The magnetic clasp will help prevent your glasses from falling out if the box turns over in your backpack.
